

Building the Capacity of Educators & Librarians in Information Literacy

About the project

The Educability Erasmus+ project is oriented towards educators in all types and levels of education as well as librarians in all kinds of libraries, with an interest in their continuous professional development in literacy skills. In addition to Information Literacy skills, other existing and emerging literacies are considered of vital importance for personal, social and environmental feasibility. These literacies included the following six, as identified by Educability: Critical Information Literacy, Digital Literacy, Mobile Literacy, Media Literacy, Data Literacy and Sustainability Literacy.

Formal education has not yet adopted these literacies to a sufficient degree, due to organizational issues and the emerging nature of the majority of these literacies. However, educators and librarians are well-placed for the dissemination of the aforementioned literacies to the communities that they serve. Thus, the Educability open access vocational education and training information literacy package for educators and librarians, as output of Educability, renders a transnational effort to cover the aforesaid educational gap.

Target Groups

Primary target group

- Secondary educators
- Tertiary educators
- Work-based educators
- Teaching librarians

Secondary target group

- Policymakers
- Private and public sector organizations

Objectives

The Project adopts a holistic end-user-driven approach for accomplishing the following objectives:

(A) to develop a freely available Information Literacy Training Package (ILTP) consisting of 6 complete Literacy Models.

(B) to train educators and librarians, in the core skills of Information Literacy, as a horizontal goal, and in new literacies, as a vertical goal.

(C) to converge in terms of strategy, expertise and infrastructure in Information Literacy initiatives, at a transnational level, by the approval of a transnational memorandum of cooperation, sustainability and transferability between the EDUCABILITY Project's partners.

Intellectual Outputs

The partners collaborate to produce the following Intellectual Outputs:

IO1: Transnational Information Literacy Ecosystem Mapping (TILEM)

IO2: Six Information Literacy Learning Modules Curriculum Development (SILLMCD)

IO3: Virtual Learning Environment & Web Portal for the Information Literacy Training Package (ILTP)

IO4: Transnational Memorandum of Cooperation, Sustainability and Transferability

Partners

Technogiko Panepistimio Kyprou, Cyprus
Universidad Carlos III de Madrid, Spain
Panepistimio Dytikis Attikis, Greece
Univerzitet u Novom Sadu, Serbia
Center for Social Innovation (CSI), Cyprus
