Europe and Sub Saharan Africa

## Technology that helped shape learning

January 1981 – Internet

March 1995 - Backrub

May 1998 - Google

June 2000 – Turnitin

November 2022 – Chat GPT

# AI a case for good?

- We recognize that for educators, there is a pressing and immediate need to know when and where AI and AI writing tools have been used by students.
- AI is used in a number of ways in our products and services and all of them aim to provide educators and students with the tools to learn and gain feedback more efficiently
- At Turnitin we recognize both the worry of educators in detecting AI but also the potential opportunity it give them to embrace the technology to make more informed decisions for their students

Remember, we have been here before and  
technology will never stop advancing!!!

**BUT NEITHER WILL WE**
